

MANOJ GOWDA B R

Team Lead / Software Engineer

mail@manojgowda.in | manojgowdabr89@gmail.com | 9513849323 | [linkedin.com/in/manojgowdain](https://www.linkedin.com/in/manojgowdain) | github.com/manojgowdain | manojgowda.in

SUMMARY

Software Engineer with 2.5+ years of hands-on experience building, shipping and maintaining production systems across web, Android, React Native, desktop and IoT/health-tech platforms, now leading and mentoring development teams as Team Lead. Comfortable across the full stack — designing REST and GraphQL APIs, backend services and database models, building responsive web and React Native applications, and deploying and operating systems on AWS. Experience with real-time device data, BLE communication and MQTT pipelines, with a track record of taking products from architecture through code, deployment and production. Open-source contributor and npm package author focused on solving practical payload, performance and device-integration problems.

EXPERIENCE

Team Lead

Sep 2026 – Present · Bengaluru

Skoegle IOT Innovations Pvt Ltd

- Led and mentored development teams, ensuring adherence to high-quality engineering practices across multiple projects.
- Designed and implemented system architecture for 5+ projects, focusing on scalability, performance and cost optimization.
- Owned projects from technical planning through production support, driving timely delivery and long-term maintainability.

Software Engineer

Jan 2026 – Aug 2026 · Bengaluru

Skoegle IOT Innovations Pvt Ltd — Client: School Bright (Singapore), Pwr Bands (India), Dmarg & Vmarg (ImageInfo Systems)

- Helped shape product architecture, infrastructure and scalable backend systems supporting large-scale IoT and health-tech deployments, working across the full product lifecycle from design to production.
- Built REST APIs for hardware communication and GraphQL APIs for client-facing applications, and designed MQTT data pipelines to collect, process and stream real-time data from hardware devices.
- Built Docker-based production infrastructure and zero-downtime CI/CD with GitHub Actions and Docker Compose; managed AWS EC2, RDS PostgreSQL, S3, VPC, Cloudflare CDN/DNS and NGINX.
- Maintained production reliability for 20,000+ IoT devices using Portainer/Dozzle observability and automated maintenance workflows.
- Open-source contributor and maintainer of Toonkit; solved IoT payload-size and parsing problems with compact, typed TOON payloads that declare schemas once instead of repeating JSON keys.
- Built Toonkit as a reusable JavaScript/TypeScript toolkit with TOON ↔ JavaScript parsing/serialization plus HTTP-client and Express/Fastify integrations, improving payload efficiency and frontend/backend symmetry.
- Created FoNotify, an SSE-based real-time communication alternative to MQTT.

Junior Software Engineer

Jan 2025 – Dec 2025 · Bengaluru

Skoegle IOT Innovations Pvt Ltd — Client: School Bright (Singapore), Pwr Bands (India), Dmarg & Vmarg (ImageInfo Systems)

- Developed backend systems with Node.js and Express, using PostgreSQL/Sequelize for relational data and MongoDB for rapid prototyping and flexible data models; involved in system design, database modeling, API architecture and performance optimization.
- Developed and published React Native Android applications, working with BLE communication and real-time health metrics, while contributing across frontend, backend and IoT integration.

Junior Software Engineer

Jun 2024 – Dec 2024 · Remote

TransFi India (Product Based Company)

- Built and maintained crypto aggregation and fintech platforms using MERN/PERN with real-time integrations, secure third-party crypto APIs, payment gateways and social login.

- Revamped the Ramp fintech product from scratch and built WalletExpress, an internal automation tool that saved 20+ hours/week and earned 2nd place in company project contributions.

Software Engineer Intern

Apr 2023 – Jan 2024 · Bangalore

Delbo Digital

- Built and deployed MERN applications for e-commerce and internal business operations; developed REST APIs, authentication and RBAC.
- Integrated Firebase authentication, realtime database and cloud storage; managed Zoho Workspace email setup and user support.

Freelance Software Engineer

Freelance

Domico

- Handled AWS-based deployment, server setup, maintenance and production operations.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, HTML5, CSS3, Tailwind CSS

Mobile & Desktop: React Native, Android, iOS-ready React Native development, Electron

Backend & Realtime: Node.js, Bun, Express.js, Fastify, Python (Basics), REST APIs, GraphQL, WebSockets, MQTT, SSE

Data & ORM: PostgreSQL, MongoDB, Redis, Firebase, LevelDB, Mongoose, Sequelize, Drizzle ORM

DevOps & Cloud: Docker, AWS (EC2, S3, RDS, VPC), GitHub Actions, NGINX, Cloudflare, Vercel, Hostinger

Libraries & Publishing: NPM package development, reusable SDKs, TypeScript libraries, open-source maintenance

OPEN SOURCE & PUBLISHED WORK

Toonkit — Open-source, compact typed TOON toolkit for APIs, IoT and real-time systems, with a parser/serializer, type system, payload-size comparison, and HTTP-client and Express/Fastify integrations. Official site: toonkit.js.org, docs: toonkit.js.org/docs, npm: npmjs.com/package/toonkit, source: github.com/manojgowdain/toonkit

SkoFit — **Google Play** — Published Android fitness application by Skoegle IOT Innovations Pvt Ltd.

Aventra — **Google Play** — Published Android tracking and monitoring application.

GitHub Profile — Open-source projects and source code. github.com/manojgowdain

NPM Profile — Published npm packages and reusable JavaScript/TypeScript libraries. npmjs.com/~manoj2002

Portfolio — Personal portfolio and project showcase. manojgowda.in

SELECTED PROJECTS

blekit — TypeScript-ready BLE SDK for React Native wearables and health devices. Reads Heart Rate, SpO2, Temperature, Steps and Battery, with Kalman filtering, background sync and an Expo config plugin.

ssdiskdb — Embedded disk-backed NoSQL key-value store for Node.js/TypeScript using Google LevelDB, with Redis-like APIs, AES-256 client-side encryption, RBAC and a web dashboard.

walletExpress — React + Express.js developer tool for dummy Bitcoin/Ethereum wallet generation for Web3 testing, with Telegram bot integration.

Vmarg — B2B API platform for GPS tracker/IoT integrations using Fastify, PostgreSQL and Drizzle ORM, with Toonkit for device-buffer processing.

Portfolio — React + CouchDB portfolio deployed on AWS EC2 with Cloudflare CDN.

EDUCATION

Computer Science and Engineering — AMC Engineering College, Bengaluru · 2024

Academic and personal projects included KissanBazaar and Car Profile APIs. Strong foundation in MERN/PERN development, databases, networking, APIs and system design.
